China Southern Partners with Martinair in Cargo

On 15th September, China Southern and Air France KLM Martinair signed a Memorandum of Understanding as part of a strategic cooperation in cargo transportation. Based on the MOU, the two companies will share their capacities on Sino-European routes as well as their respective networks with each other. For example, Martinair will use China Southern's network in Asia and the Pacific to transfer their cargo via Guangzhou to major cities in Australia and Vietnam; China Southern will transport their cargo to cities such as Atlanta, Miami, St Paul, and Buenos Aires, through Martinair's wide-body airplanes and two air hubs in Amsterdam and Paris.
