## **“TALENT CULTIVATING PROGRAM” EXPLORING CHINA AIRLINES’ SUSTAINABILITY**

China Airlines is collaborating with KPMG Taiwan, a sustainability development consultant corporation, on planning a “Sustainable Benchmarking Corporation in Practice Observation Tour” program, guiding the “Talent Cultivating Program” students from NTU School of Management to deeply explore China Airlines’ sustainability development and its challenges. By sharing its CSR development achievements economically, environmentally, and socially in recent years, and broadcasting its spirit of sustainability development, China Airlines tries to help the students grasp the trends of the corporate operation.

China Airlines has been officially implementing Corporate Sustainability Governance since 2014. So far, China Airlines is the only corporation in Transport Industry from Taiwan who has been selected three times by DJSI Emerging Markets, FTSE4 Good Emerging Index, and has won five times the TCSA awards. Its sustainability is highly recognized by domestic and international rating agencies.
